# COMICS

Good question

# Good Question

BOOK 1  
**ARRIVALS**  
(AT SCHOOL AND FIRST QUESTIONS)...

Author: Michael J. Emme & Anna Kirova  
Script & Storyboards: Michael J. Emme  
Character Development, Ink & Color:  
Andrew Jackson Obol

Hey Lil' Mo!  
Hurry up!  
The bus is here!

Nah!  
My carrots need me  
and you don't.  
I'll catch up...

BBrrum  
Bum  
Bum  
Bum

...more space on the street  
than the bus anyway.

School starts too early!  
Dad's restaurant  
stays open too late!

Hey Ka-teena!

BBrrum!  
BBrrum!!

TWO buses  
passed me by.  
I think they hate me.

Yak! Yak!

snork!

muT Ter!

mghph?

Giggle!

squich... squich... squich...

Brum  
m

m

SCHOOL BUS

squich...squich... squich...

squing...  
...squing  
squing...

We need to put this thing up before class!

Be right there. I have better tape in my backpack, but I have to go around to the other entrance.

All VisitorZ PleaSe rePort to the oFFiCe.

Somebody stuck something gross to my locker!

I hope I don't have to stand up and talk today

No running!

I'm already hungry!

I wonder what's for lunch?

Is that a new kid?

squing...

...squing...

...squing...

WASH ROOM

**Ka-SLAM!**

mmf...  
help!

They just  
crammed me in there  
for no reason!

Grmmph!!

Grumble...

I can get it!...  
...with this thing  
I made last week  
from plastic toy  
pliers and  
a spring.

cough!

Yack!

echo!

Giggle!

rush!

Class!

Please come inside!

Its time to begin!

zzip!

Gah!

flip!

snap-a..  
snap-a..  
snap!

In your walk or ride here today, (or this week or in the last month) did you see, hear, or experience things...

...that made you wonder, "Why?"

Is there anything about our school or community that could be better if it was different?

**Class! ...Everybody Brainstorm!...**

If my garden was bigger, we could use that food here!

Some of the alleys on the walk to school are bad.

Why are the playground garbage cans always so full and gross?

How old is this building? It looks like a castle (which is cool), but nothin' works.

Every time I skateboard from home I get yelled at. Maybe the school could build a skate ramp. We could all use it. (...and I wouldn't get so much grief!)

I wish the food at school was as good as my Dad's

murmur  
murmur

When it's busy at the restaurant, it's hard to finish homework, plus I need to save for art supplies

Yesterday one of the grade 3 boys came into the girl's washroom. I think he was afraid to use the other one.

**Class! ...Your ideas might be good research questions.**

Now class...  
...To turn your good question into research, you will need to collect data  
...'Data' is the word for any thing you carefully notice, and record or remember so you can think about it later.

...I bet each of you have favourite ways to collect data about your daily life?

...as you think about your questions, describe your best way to notice and remember.

When my grandma tells stories I can imagine walking downtown when it was mostly a forest. Think what I could grow with more space for my garden!

Everybody teases me because I like to talk, but I listen too! I can find out what everyone is thinking when I listen!

I draw a lot and it helps me notice how the buildings are built, and what is in each window. I notice signs, and how people work and play and even fight.

**Class...**  
Data can be collected as living history, video, photography, drawing, interviews, mapping, artefacts, and more...

**Now Class!** Please get in to smaller groups and focus your Big Questions and ideas about how you could collect data...

If we interviewed little kids, janitors, and different classes, we could get plenty of ideas about this place

Hah! Mostly complaints, I bet. I could build a scale model of nothing but complaints.

What if we invited everybody to take photos or draw on a floor plan? It could be like a map of the school with pictures.

...about the school,...

...or about the community.

I could ask my grandma to tell more stories. If she's ok with it, maybe I could record them, or tell them myself.

If you pull me backwards on my skateboard while I hold my camera, we could see the traffic, and how the neighbourhood changes near the stores, apartments and vacant lots

Ever since I was little, when we first moved here, I have been drawing... (when its been quiet at the restaurant). I have lots of drawings of the stores and people outside the window. I could do more.

Sometimes I get video of some pretty wild things...

TEACHER!!!?

What do I do if people start saying mean stuff?

Grandma says some of her stories are just for family & not for everyone to hear.

How do I make sure the pictures of the school are o.k?

Can I only use long, detailed drawings? Or are quick ones good too?

**Class...**  
before we really begin...  
...Plan your research to be safe for you and for the people in your story - they are your 'participants'.  
The Story you find is meant to be shared,  
to encourage discussion, maybe change things, but not embarrass people.  
So...  
• Plan your questions.  
• Introduce yourself.  
• Ask permission.  
• Inform participants they will get to approve your telling of their story.

BBRRINNGGG!

CAFETERIA

Bo! Save me a place in line!

We can eat in the little kid's corner. I have questions & permission forms.

step  
step  
step

So tempting to jump...

step

step

I hope they have soup today. Its better than the overcooked vegetable 'surprise'.

The caf isn't so bad. -if you like greasy brussel sprouts-!

The food here sucks! Bug-Zee!, Lil'Mo! Come eat with me at Dad's restaurant, then maybe we can start our research

Scho Cafeteria

sprint!

shuffle

skuff

You two know you can't go in with the little ones...

...You'll have to wait!

But we have a note...

...from Ms. McC.

We're doing research!

Don't forget, lunch ends at 12:52 and the door is locked at 12:57

Can we visit Ph•lo and Ed•e at the Youth Center after we eat?

I think we'll need to use the bus if we can catch it.

For research of course!

Yay!

hey?

# Good Question

BOOK 2  
INVESTIGATIONS  
(OF SCHOOL AND COMMUNITY)...

Author: Michael J. Emme & Anna Kirova  
Script & Storyboards: Michael J. Emme  
Character Development, Ink & Color:  
Andrew Jackson Obol

clatter

click!

Bo•La•Fo!  
Go to the bottom of  
the stairs and catch this!

Thunk!  
Thunk!  
Thunk!

Wuh?

Hmm!

Hah!

click!

click!

click!

shuffle

mumble

munch

gnash

yack 'n chat

Why are you taking pictures?

We're doing research...  
...being reporters

Why?

...for fun.

...to investigate  
and understand.

...to tell a story  
that shows what  
school is really like.

Do you want to see?

I'm really not comfortable with that picture of me. I look angry, when I was really scared.

...can you please delete it?

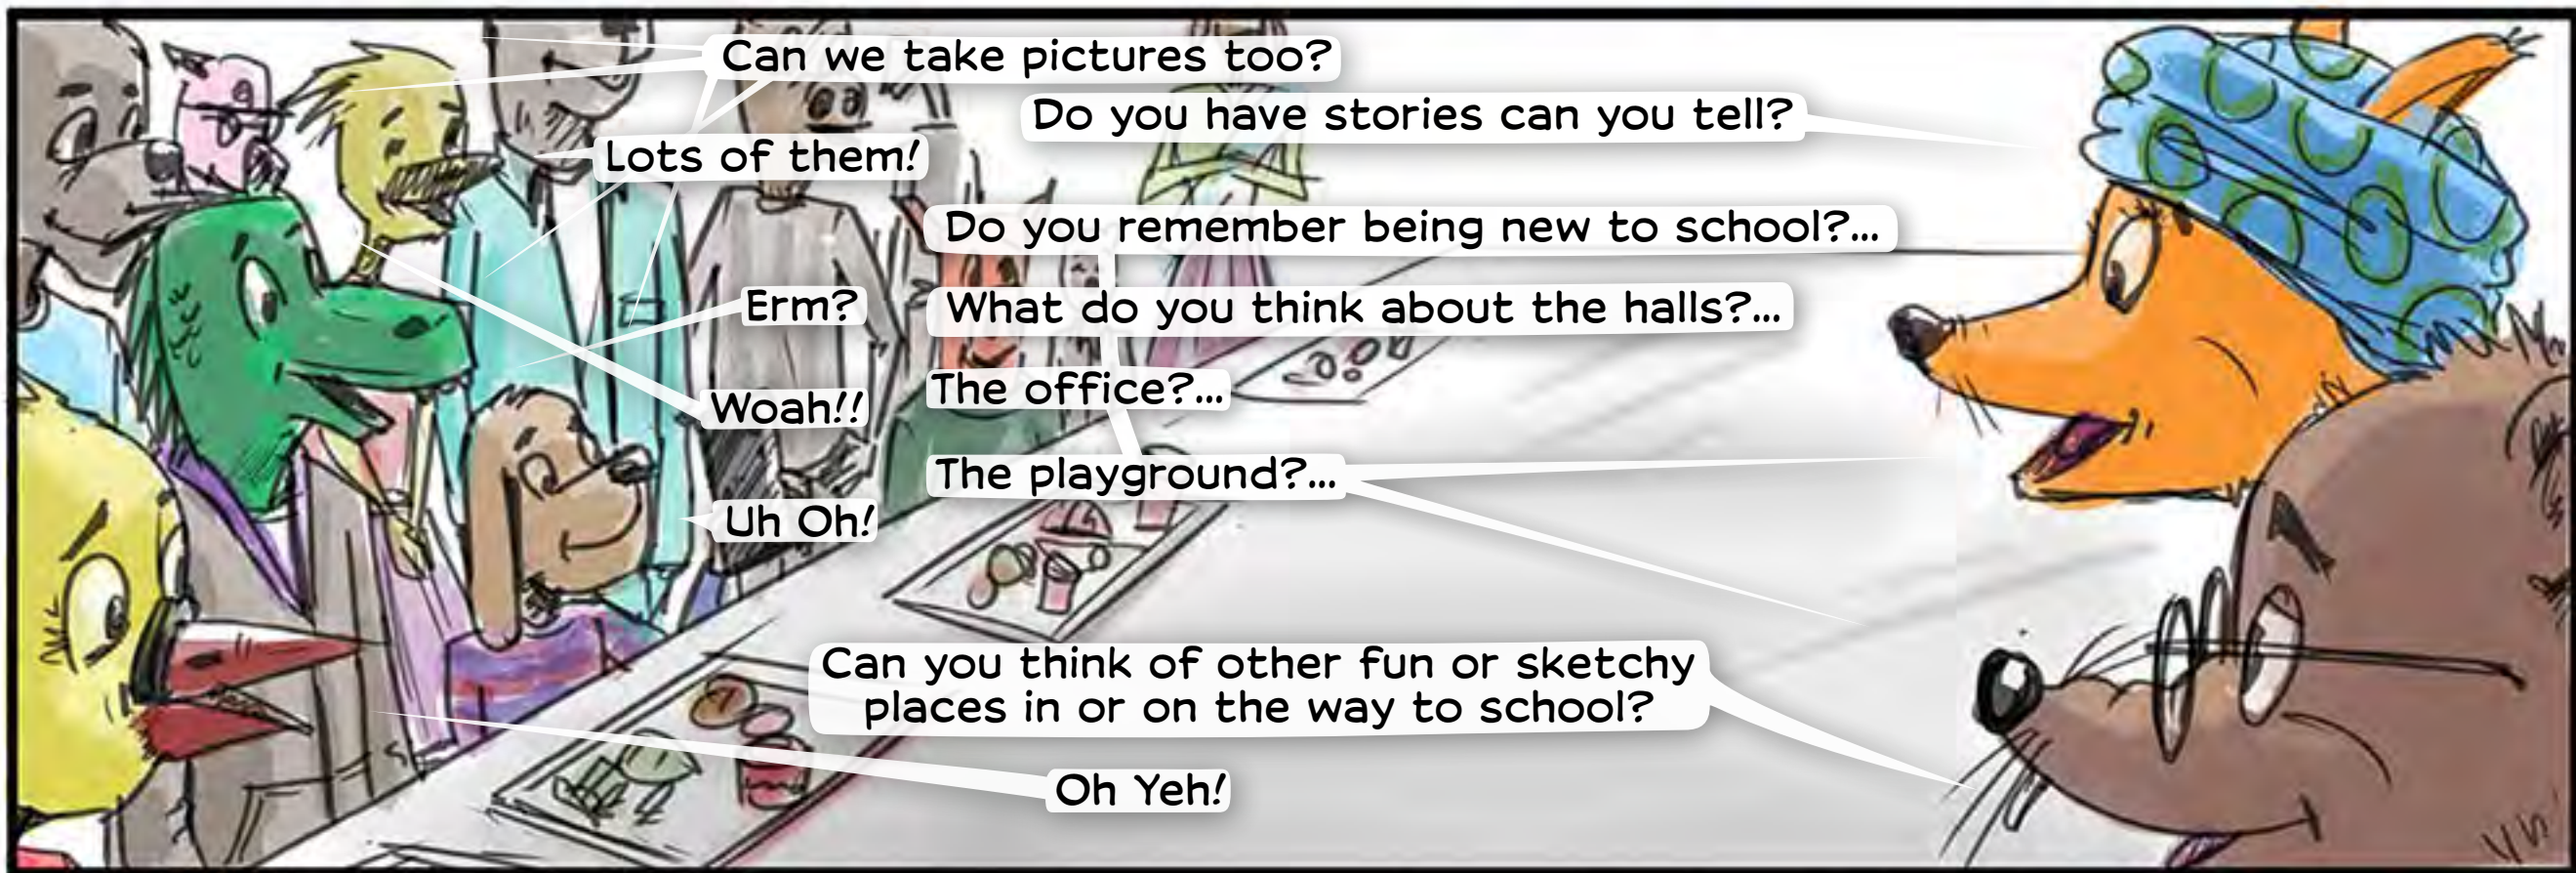

Sure!

Thanks!

Now that I get what's going on...

...that was quite the jump!

Pretty cool, eh?

Can we take pictures too?

Do you have stories can you tell?

Lots of them!

Do you remember being new to school?...

Erm?

What do you think about the halls?...

Woah!!

The office?...

Uh Oh!

The playground?...

Can you think of other fun or sketchy places in or on the way to school?

Oh Yeh!

Belonging

Strange

Afraid

Lonely

So if we get into groups, and find cameras, we can research together and tell stories about school life.

OK!, but ... where will we get that many cam...?

...huh!? ...Wow!

Wait! Wait!  
Not yet!

Your research can tell your stories, but everybody has to work together.

We'll come to your class at the end of the day to talk with your teacher...

...to create teams around themes...

...and pick places to photograph.

Sheesh! These guys are gonna go nuts! How will we keep track of all their pictures?

How about a map or a poster that we can stick their pictures on to?

Later...

What a drawing job!  
There must be a hundred rooms  
in this old school!... ..and  
stairwells going to (mysterious)  
locked doors.

I think we should get the janitor,  
Mr. Dus-T, to check this for us.  
He has keys to everything. He'll know.

Isn't his room in the basement?...

Yeah!

Don't forget the dark corner  
outside with the dumpster.  
I lost a ball in there once  
when I was in grade 4.

Have you ever taken the  
freight elevator to the  
basement before?

No...

You missed a few washrooms and the old PE storage room...  
...but this is pretty good kids.

I recognize that.  
It's a typewriter!

And these are class photos...  
...they must be 100 years old.

Just about...  
...if you look close  
you'll see me  
in there somewhere.

What's the flat bat for?

Hol-yyy! Look at all  
this cool stuff...  
...trophies, old games  
& uniforms.

Do you really want to know?...  
It's not a bat.  
40 years ago it used to be  
in the principals' office...

Ulp!

Did the school  
used to have a  
marching band?

No. Those are cadet uniforms.  
Long before I went to this school,  
kids used to practice marching like soldiers.

You went to school here!?

Why are the girls and boys using different doors?

Yup.

I'm not sure. I guess they really thought girls and boys were different back then.

Those are called filmstrips. They're for teaching.

Look! Little rolls of plastic with pictures on them. ...and books with no pictures at all.

What a load of questions. This feels like an interview.

Yeah!

Meanwhile, a few blocks away...

C'mon in!

This is your Dad's restaurant?

You can really see  
the youth center from here.

My Granny and Gandpa too.  
It belongs to all my family.  
I work here after school and on  
weekends when my homework is done.

Wow!

Come on to the back and  
we can get something to eat.

I don't recognize  
this food, but it  
smells good!

nonk!

Wow. It's cool back here.

Grandma!  
I've brought  
friends from  
school!

I really like that you can see  
the mural and old advertising  
underneath it on the YC's wall.

I wonder what that building was  
before it became the YC?

So how does  
all of this fit  
our research  
anyway?

My Dad found some old pictures of the restaurant when the buses were on train tracks. I did drawings of them. See?

Nice!

What'r you doing Bug-Zee?

And here's the restaurant and alley 50 years ago.

I wonder what kind of food they had?

Look how dressed up the people are!

Ka-teena, can I take a picture of your drawing and the front of the restaurant now so I can see how they look together?

Fun!

We could even pose in the same places as the people you drew.

Pose like this!  
In the old photo I drew,  
the people were a couple  
being elegant!

It's just about time  
to open up!

Looks like the usual crew...  
...I'll unlock the door

I don't know  
about this...!?

Click! Click! Click!

skreek! skreek!

let's show  
Ph-lo and Ed-e  
before we get  
back to school.  
Maybe they'll  
have ideas  
about how to  
turn this into  
research.

Whatcha doin'?

Yah?

Nice camera kid.

Ullp!

Let me  
see this!

Yeah!  
...we're researching.  
If we show how the  
street has changed,  
Maybe we can make  
things better.

WE have ideas about THAT!

Ummm...  
...We...we..'re  
taking pictures...  
for school...

**FOOD'S  
READY!!**

Our mural  
made the  
alley better

Nice drawing.

We were about to show  
Ph-lo and Ed-e...  
...and get their ideas.

Hey Ph•lo!  
Look at our pictures.  
They're data.

Okay-y...?

Huh?  
What's data?

We're researching how the  
street has changed.

Interesting.  
Can you come inside  
for just a second?  
I want to show you  
something too.

We have to get back to  
the school soon, but we  
wanted to show you.

Maybe with video it'll be like  
flying down the sidewalk!

Cool! So videos and drawings are data?

Definitely.

...but  
**YOU** have to walk!

Er.. Sorry!

Wrec Room

Check it out!  
We're doing research too.

Ya! sure you are.  
Lunch isn't research.

No! In the Wrec Room.

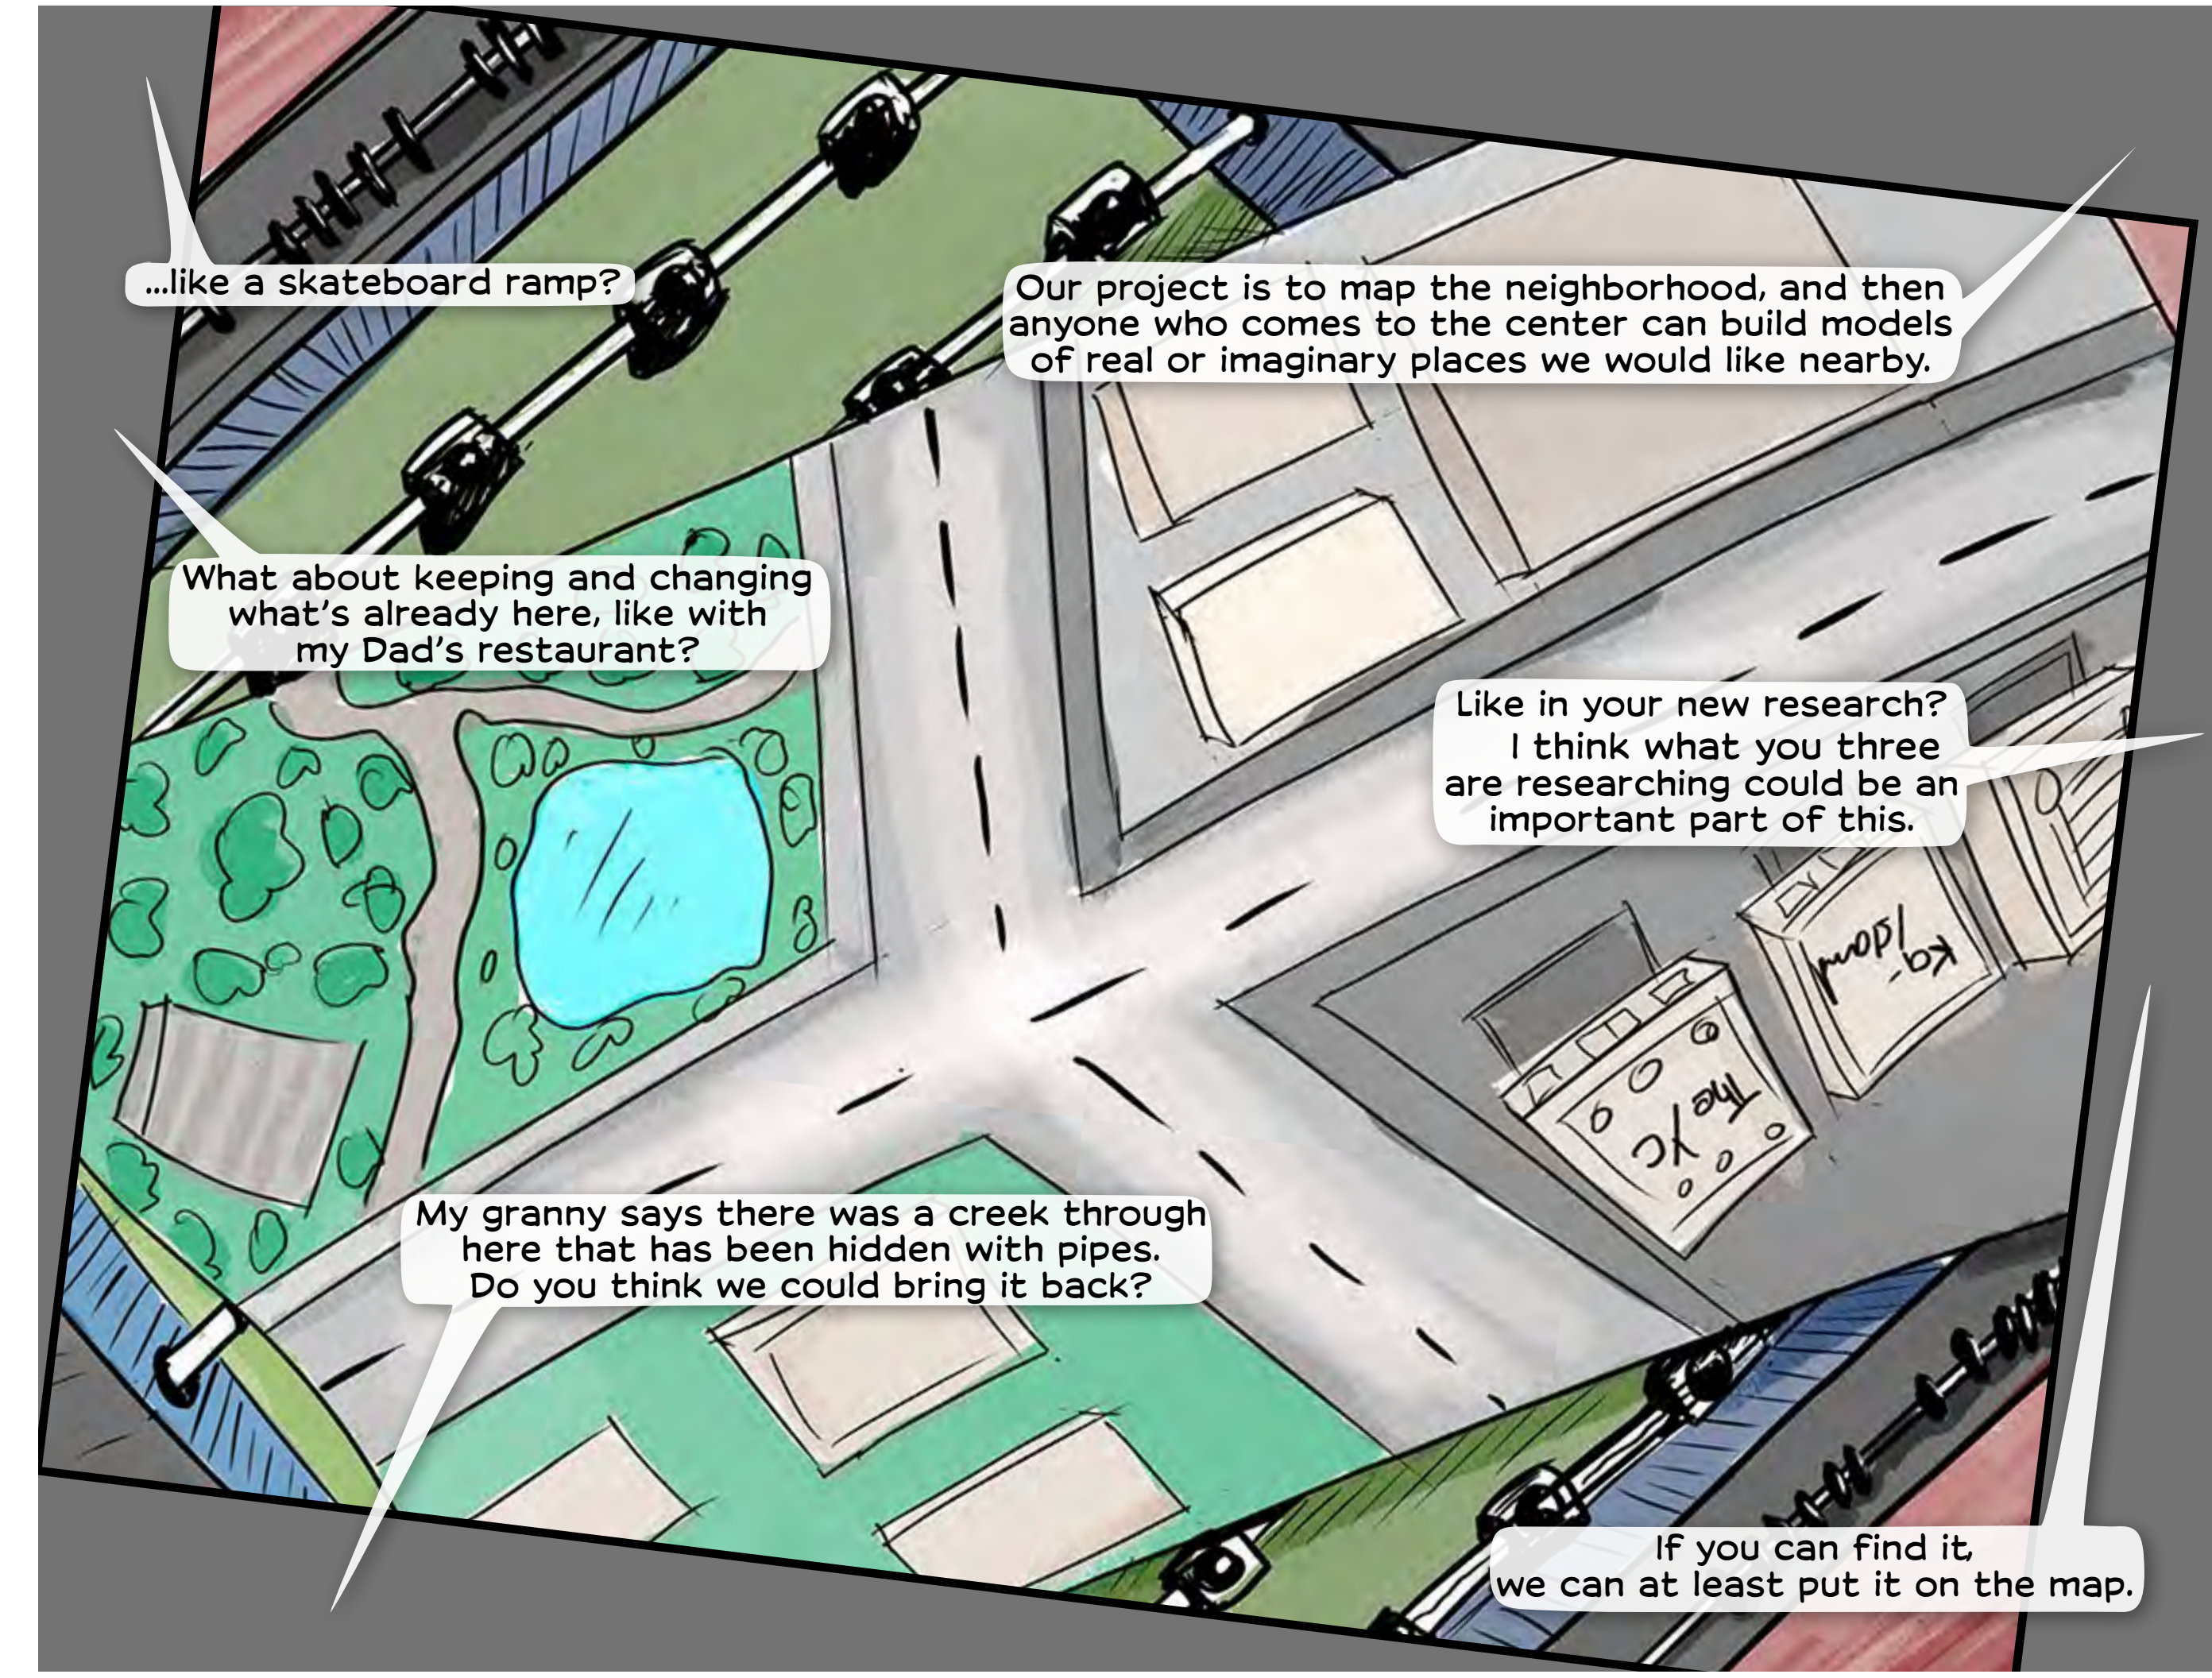

Huh?

Wow! What is it?

It's a map of the street  
and the beginning of a  
neighborhood plan.

...like a skateboard ramp?

Our project is to map the neighborhood, and then anyone who comes to the center can build models of real or imaginary places we would like nearby.

What about keeping and changing what's already here, like with my Dad's restaurant?

Like in your new research? I think what you three are researching could be an important part of this.

My granny says there was a creek through here that has been hidden with pipes. Do you think we could bring it back?

If you can find it, we can at least put it on the map.

# Good Question

Authors: Michael J. Emme & Anna Kirova  
Script & Storyboards: Michael J. Emme  
Character Development & Ink:  
Andrew Jackson Obol • Color: Lou Girardo

BOOK 3  
MAKING SENSE  
(AND SHARING)...

...where on the map? You can reach with this if you want to do it yourself.

Tell me why you took a picture there?

Asking questions

Can you see the concrete animals at the corners of the building?

They look like monsters!

roll...

documenting

The sun, the soil and the water have been part of this place for longer than we have. This land has fed us for generations.

How do you know Grandma?

Good question. Let me tell you a story.

taking time to listen

So... what is THAT thing? Sounds toxic!

...an electric brush cleaner. If a boy was good, he got chosen to clean the chalk erasers.

It was great fun... really loud, and made big white clouds!

...Why only the boys?

Good Question.

critical wondering

Through sketching, sharing and feedback, Ka-teena discovered the youth at the YC saw (and used) the buildings and streets differently than she did.

⋮

Bo-La-Fo and Mau-C chased little kids with cameras who looked in places only little kids notice.

⋮

And they listened to Dus-T's stories while digging through the school's old treasures.

...Later,  
in their classroom...

**Class!**  
I can see that you've  
been hard at work  
gathering data and  
investigating your  
good questions.

Look at my drawings.  
Did you know that the  
Youth Center used to be  
a furniture store? ...and  
the restaurant was a  
restaurant, but it looks  
like they sold mostly  
sausage and cabbage.  
...and some of the older  
kids at the Youth Center  
have done amazing  
things to the alleys...

I've skated every street within 4 blocks of here & have video... everything:

...of people walking, hanging around and even sleeping right next to crazy traffic... and the garbage being collected, bus stops emptying and filling with people moving, reflections in store windows,...

But..

We asked the little kids to show us the places they liked and didn't like in the school and they must have shot 30 pictures each!

Our map of the school is buried under pictures...

So...

Yeah! And did you know that Mr. Dus-T has a room full of great old stuff and that he used to be a student here too?

So...

My grandma told me all kinds of cool stories about the land. Some of them are from when she was little, and some are just for family...

But..

...WHAT do we do NOW?

Class! You have batches of data!  
But research isn't just gathering  
interesting information and stories.  
Do you remember your big questions?

Do city buildings  
tell stories?

Is our school  
a good place for  
little kids?...

...for ALL kids?

...and  
Skateboarding!

...what about the  
garden and creek?

Think of your data as clues to understanding your big question.

To make sense of your data  
You need to get to know it:

- by looking, listening and reading closely...
- by sorting it, taking notes and imagining what it might mean.
- Even PLAY with it!

Your data is like a brand new collection.

First look closely at every part of the collection and just enjoy noticing what makes it special.

You will start to see patterns!

Use those patterns to sort your data. (by putting pictures into piles, or writing down words people said that are interesting and get used a lot.).

In research, this is called 'coding the data'.

Once your data is organized, you may discover that it tells someone's story, answers your question, or even surprises you.

This is called analyzing your data

And finally, ...ask your research participants if they want to share their stories.

Sharing your findings will let the community you researched know that you heard them. And may even help make decisions.

Ph-lo and E-de at the YC invited us to include our drawings and video in the youth exhibit about the community they are planning.

I'm not sure about putting these on a wall to show!

When your data combines observation with your creativity and feelings, it is art-based research. You can organize your research and show it as art.

I want to show it all!

Bug-Zee. How many minutes of video did you take?

Heh. Heh. Minutes? Hours!

Ka-teena, can I help you curate your drawings? We (or a group of classmates you pick) can give you ideas about which to include and how to group them.

Bug-Zee, If you can cut and connect those shots into a 5 minute story, your data can be shared (and people might actually watch to the end!)

?

Bug-Zee! What is your research question again?

I think you need to make a list of all your shots. If each has a number and a description, you can pick which to edit into a sequence. There may be more to your research than you know.

I want to build a skate park.

As you log your shots, think about:

- What you saw,
- How you felt,
- How your skating made others feel.
- How time of day mattered
- The way others used the sidewalk & alleys.

I bet other ideas will pop into your head too!

tick-a tick-a tick!!

I did see some kids I'd never met in a cool abandoned building.

I've got alleys too!  
They're not so good for  
skateboarding.  
Too full of boxes and stuff.

Which drawings look nice?  
Does that matter?  
Which tell stories?  
How do you think they  
should be arranged?

Ka-teena's drawings are about  
walking and looking slowly  
My video is going to be  
about moving... fast!

What about the  
drawings of  
the alleys?  
They're different.

I can tell that  
I live near you,  
but I usually  
walk faster  
by the alleys

Remember.  
5-minutes,  
and a theme!

Why use color to draw stores with  
apartments on the 2nd floor?  
Everything else is just grey pencil.

I like that some show new buildings  
built next to old ones...

Lil' Mo?

tick-a tick!!

You seem quiet Lil' Mo. Is something the matter?

I don't have any data!

You said we had to collect data and that I could interview my Grandma. So I got a recorder. We sat in the garden and I asked her to tell me stories about the creek and about the land before the city was built.

She talked and talked about me when I was little, but only started to answer my questions about long ago after the recorder ran out of batteries.

Afterwards she said those stories weren't meant to be recorded! They're meant to be Told.

Grandma's so nice, and I learn so much from her, but how will I finish my research without data?"

Hearing Grandma tell the stories from long ago made me feel good, but I don't know how that is research.

Hmm... I think, your grandma has given you something very special. Maybe she IS your data.

Do you think she would come to class, or go to the YC... to TELL stories?

In another corner of the classroom.

So... What can you say about the piles of photos the little kids put on your floorplan?

They're different sizes...?

How different?

We'll have to count them.

...or measure them. With numbers turned into shapes we could make a bar graph...

...that shows the most scary part of the school for those kids.

A graph can make data easier to understand. But it can also trick us into thinking something (like bullying) is simple, just by looking nice.

Hah!... Um?... Ok Ms.M.

Crash!!

So... when you are done with this, be sure to show it to the little kids. It's THEIR information. You need to know if they think it looks like their story. In research, getting approval for your analysis is called a 'member check' Because the little kids are members of your team!

AFTER a VISIT WITH the LITTLE KIDS...

So, we made a great graph with bars and colours, and took it to the little kids...

Where's our picture-map!!!!

We see that turning your piles of pictures into a graph told US a story...  
 ...but let's try again. You took lots of good pictures of an empty room, or ones we can't use because they show people (who hadn't signed forms). We can see they are important to you, but what IS YOUR story!?

**Bathrooms & Bullying!**

- kids hide, jump out, and tease.
- I'm not allowed to use the girl's.
- I see mean drawings on the walls.

...CAME a NEW DIRECTION...

When we saw them acting out what scared them, it was like a play, so we asked if they wanted to do a performance or make a comicbook about those stories.

They chose comics. Bo-La-fo helped with poses and I snapped photos, then we put it together like this. It's a photo-comic. Their teacher called it a fotonovela.

This is Great! From a photo-map to a bar graph, to a comic! Each sure adds something to the story.

The little kids are sometimes really afraid in the bathrooms. I get that. And I bet they could come up with a new design that was better!

Maybe you, the little kids, and your teachers could take this to the principal!?! It makes a pretty good case...

You can see from all the pictures and old stuff down here, that the building has been renovated a bunch of times... ..and it is definitely due for some more work.

Ms. McCauley said we can research **STUFF** too.

I wonder if we could use this to show that sometimes the old ways are not fair...? or that even schools can change!

I have an idea! We can make a display for the case in the the school lobby.

"... by selecting, studying, comparing and exhibiting artefacts... you can ask good questions about the past and the present and how things could change in the future."

Instead of trophies, we can show a history of how the school has tried to get better.

... and after some planning and work together...

They sure have lots of ideas.

...more light!

...lower sinks!

...no hiding places!!

...better smells?!

...a meeting with the Principal.

The little kids are working with their teacher and Mr. Dus-T on a new, safe bathroom design.

We hung their stories at THEIR eye level, because that's how they see the school!

Interesting!

Skuff..

Next week, you should come see (and hear) our research too!

It's part of an exhibition at the YC.

Ph-lo, Ed-e & the YC crew are gonna fit our art and Lil' Mo's Grandma's storytelling with their plan for the city.

sprint!

clop..  
clop.

snap!

shuffle...  
shuffle...

At the YC, the 'Changing City' idea fair started taking shape

Wrec - ROOM

So... The idea fair is our plan to show the city some new ways of living together. Your research may be a class project for you, but we want this show to make a difference.

How do you think your pictures, video and stories will help?

My drawings show how different people keep coming here and working to make this place beautiful (and useful)!

I think my video shows what the street looks, sounds and feels like.

My grandma can tell stories about how we lived with rivers, trees and animals right here!

...and one week later, friends, family and neighbours join the YC Youth and Ms. McCauley's class at the opening of the YC 'Changing City' idea fair.

We discovered an old, empty warehouse that would make a great indoor skatepark!

I know that building. I sleep there when it's cold because the shelter won't let me keep my dog. She's my friend and keeps me safe.

This is Arts-based research. It shows the buildings are beautiful...

What can be done about THAT?

Whoa! Good Question.

...and how they have changed is interesting

At the city planning office, we have questions about that too.

Imagine when MY grandmother was your age, and sitting right where you are. There were no buildings yet. You would be on a grassy slope. Instead of in a room with a TV. You would hear a creek and be watching small fish swimming.

...That's so cool!

It's still there too! Just hidden in a pipe.

This story would make a great play.

so why is the creek hidden?

Good Question!

...back in class the week after the hall display and idea fair

Class! After all of your great work, how do you feel about research?

My Grandma isn't so sure that her stories will change anything, but somebody sprayed a tag that says 'free me' on the pipe that holds the creek.

I think I will get to paint with the YC crew on their next mural project! It's gonna show all the different ways youth use the city

We looked and asked lots of questions. I know we saw and heard plenty of new things. Maybe it will all make a difference... ..but maybe not.

Grandma says it can take a while to hear a story.

Kat and I both want to take our ideas to city hall and talk more with the planner who came to the show. I think that the city should work better for kids without homes... ..and skaters!

Along with the little kids' washroom design, the principal asked if I wanted to talk to the school board about places I still can't get to in this building.

Lil' Mo, your Grandma is right. It can take a while to hear a story. That's why your data is so important.

We need to find ways to keep all of this, so we can do more with it and share it.

But we can't keep it all here. There's no room for us as it is!

What about?...

Dus-T!!!!

Wuh?

So, down to the basement..

I'm sorry Ms. McCauley. I can take back the things your students borrowed, but if I take any more, I won't be able to work!

What's with all those cases stacked in the corner?

They used to hold tubas and French Horns. They're all empty.

What'll we do?

Hmmm... I have an idea.

Cool elevator!

...then back in the classroom.

We can't keep all of this here either!  
What do you have in mind Mau-C?

None of our questions are answered yet.  
So we need to keep our data, share it  
and let other kids add to it.

Mrfff!  
This better be  
a good plan!

It's simple! (...and even environmental!).  
We re-use these old instrument cases. Each can hold  
the data from one question, and each question/case  
goes to a different classroom in the school.

Sweet!  
So a case on school design...  
...and a case on all the old stuff.  
Maybe even a case on  
research with photography!

How does  
that work for  
stories?

Yeah!  
What about  
data that  
isn't 'stuff',  
like my  
video?

My drawings are kind of big. I'm not exactly  
sure what's the best way to keep them.

Yeah! Yeah! Yeah! All these are (GOOD!) questions.  
Wait 'till you hear the second part of the idea.

Ms. Mcauley, do you think the school would let us build a web page?

Bug-Z, you made this great video. Do you know how we could put other data in the computer too?

I don't know, Maybe?

Bo. Did you save all of the digital photographs the little kids took?

That was like 750 files, they practically killed the school laptop I borrowed. I think they are still there.

I'm not sure, Mau-C. I'll have to check. Now what do you have in mind?

Can I go ask Ph-lo and Ed-e if we can include their plan in our computer? It has the school, the neighborhood and even the restored creek.

I think I can use a camera and the computer to make small copies of my drawings, and have a trombone case be a gallery!

**Class!**  
Mau-C's inspirations...  
...really describe two ways of doing the same thing...  
...all your great ideas about including art work, pictures, sounds, videos and writing can be kept, shared and used again...  
...in digital and physical archives.  
Mau-C's two ideas are a great beginning, but I don't have a clue how to organize all of this.  
**Do You?**

Class! How DO we make an archive?

Good Question!

Here we go again...

That's our story, so far...

Your turn.
